

ALFRED UNIVERSITY

SCHOOL OF ENGINEERING AND APPLIED TECHNOLOGY

Department of Applied Electronics and Embedded Technology

Embedded Systems + CETa Career Transition Program

Assignment, Laboratory & Office Hours Manual

AU-ESET 301 | Section 001 | Fall 2026 - Spring 2027

STUDENT	William A. Green IV
ACADEMIC YEAR	2026-2027 Academic Year
DOCUMENT ID	AU-OAA-ESET301-LAB-2026-01
REVISION	1.1
STATUS	Official Student Copy

DISCERE • AEDIFICARE • SERVIRE

Learn. Build. Serve.

Prepared by Office of Academic Affairs • Issued September 2026 • Embedded Systems + CETa Career Transition Program

Personal independent-study simulation. Alfred University is a fictional institution and this document is not an accredited university record.

Use rule

Print these pages or duplicate them digitally. The purpose is to make every lab and assignment look and feel like a real course submission while preserving employer-facing evidence.

Template 1 - Weekly Submission Cover Sheet

Week / Module: _____

Submission date: _____

Topic: _____

Scheduled hours: _____

Actual hours: _____

Status: Green / Yellow / Red _____

Learning Evidence

What can I explain without notes?

What did I calculate or code?

What did I build or measure?

What failed, and what did I learn?

What evidence did I save?

What must be repaired next week?

Template 2 - Electronics / Embedded Lab Report

Lab title / date

Objective

Required equipment and parts

Safety / ESD checks

Circuit / block diagram / pin map

Pre-lab prediction or calculation

Procedure actually performed

Measurements and captures

Expected vs actual results

Troubleshooting / deviations

Conclusion

Evidence links / filenames

Template 3 - Root-Cause Failure Report

Failure ID / date

System / build version

Observed symptom

Expected behavior

How to reproduce

Initial hypotheses

Measurements / evidence

Isolation steps

Root cause

Corrective action

Verification / regression test

What I would do faster next time

Template 4 - Project 1 Design Review

Problem statement

Requirements

Out-of-scope items

System block diagram

MCU / board choice

Sensor / peripheral choice

I2C or SPI plan

UART / Python interface plan

Power plan

Inputs / outputs

Firmware architecture / state machine

Fault handling

Test plan

BOM

Known risks

Design-review decision: Approve / Revise

Template 5 - Career Artifact Submission

Artifact name

Target role family

Skill this proves

What I personally did

Tools / instruments / languages used

Most difficult problem

Evidence link

60-second interview explanation

What I would improve in Rev B

Template 6 - Office Hours / Tutoring Request

Bring this format into ChatGPT when you need focused help:

Course week and assignment code: _____

What I am trying to do: _____

What I expected: _____

What actually happened: _____

Evidence / error / measurement: _____

What I already tried: _____

What I think is wrong: _____

What kind of help I want: explanation / hint / debug / grading / practice check
